

WHAT'S NEW IN 3E TEMPLATES 3.0

KEY BENEFITS OF 3E TEMPLATES 3.0

- Core functionality is completely redesigned to provide smarter and more flexible document automation
- Enhanced server features increase performance and stability
- Refreshed and newly integrated design tools make solution development more standardized
- New administration tools give more control and better visibility into the server environment

3E® Templates™ (formerly Design Gallery™) helps you quickly transform your data into readable and professional documents that satisfy both your firm and client demands. The powerful document automation solution effectively and efficiently automates the process of turning your back-end data from 3E, Enterprise®, and other systems into usable business documents. With the newest version of Templates, document automation reaches a completely new level.

Templates 3.0 has been entirely overhauled to bring you an integrated and improved user experience. Almost all parts have been rewritten or altered to broaden the

design capabilities and provide a platform well poised to handle future growth and performance. Version 3.0 further improves the collection, reorganization, conversion, and distribution of your data and documents.

The core functionality of Templates has been redesigned as compartmentalized and reusable workflow activities to provide high flexibility and to better align with your day-to-day processes. Thanks to Microsoft® Windows® Workflow Foundation, version 3.0 now lets you perform new tasks with a higher level of control not before possible. In addition, we've made enhancements to the already powerful design tools, improving solution development and collaboration capabilities. These enhancements—in addition to improved server-class features that are built for growth, performance, and reusability—deliver the power you need to automate your document processes.

With 3E Templates, you can move ahead to a more profitable future knowing that you are working with one of the world's leaders in providing professional services firms with the most innovative of business solutions. With more than 70 years of experience, Thomson Reuters Elite has the proven expertise to make it happen for you.

INNOVATIVE SOLUTIONS FOR MORE THAN 70 YEARS

Whether you are part of a global institution, a multi-national firm, a boutique practice, a mid- or small-sized firm, a corporate legal department, or a government agency, Thomson Reuters Elite can provide you software products and services that help you broaden your strategic visibility over your business operations, simplify and boost firm-wide compliance, and confidently take on the future.

WHAT'S NEW IN 3E TEMPLATES 3.0

3E TEMPLATES 3.0 HIGHLIGHTS

New Core Engine and Services

- Backed by Windows Workflow Foundation (WF) that offers a lasting technical solution that promotes reusability and flexibility
- Core functionality is now compartmentalized as reusable workflow activities to allow for future extension with minimal impact
- Standardized logging mechanism allows you to view, aggregate, and correlate all necessary information in one place

Administration Tools Now Included

- Configuration Tool allows the definition of environments used by the administration tools and enables easy switching between defined environments (such as development, test, and production)
- Publisher facilitates pushing solutions from the development repository to the engine
- Instance Manager allows users to monitor and execute solutions that have been published to the engine
- Property Bag Manager allows common information needed across solutions to be shared in a central area for easy management and updating

Improved Design Experience

- Redesigned Solution Manager offers an updated user interface
- Component version control is now built into design tools allowing multiple solution developers to work on the same solutions
- Offline mode allows you to check out files to work on when not connected to the network
- A new Process Designer gives you complete control over the document automation processes
- Seamless Visual Designer integration lets you create components in a create-and-see-as-you-go experience

The redesigned Solution Manager provides improved usability and encourages standardized solution development.
