

ELITE

Enterprise Financial Management

GLOBAL DISCOVERY

TAKE ADVANTAGE OF ELITE ENTERPRISE'S BUILT-IN SUPPORT OF INTERNATIONAL LANGUAGES, TAXES AND BUSINESS PROCESSES, ALONG WITH STATUTORY AND MANAGEMENT REPORTING, TO SUPPORT MULTI-NATIONAL FIRMS.

Using technology to manage offices in many different countries goes well beyond software that supports multiple languages and currencies. Firms also need complex, advanced international capabilities, including: precise measurement of currency exchange gains and losses, the ability to maintain multiple general ledger account structures mandated by local laws, tax requirements for each jurisdiction, and support for local, regional and global reporting.

IMPLEMENT BUILT-IN GLOBALIZATION FEATURES

Elite® software features numerous built-in tools to address the needs of global organizations. The Elite Global Discovery engagement prepares firms to leverage these advanced features by developing an action plan that both implements the global configuration and ensures continuity of ongoing operations.

BECOME AN AUTOMATED GLOBAL ORGANIZATION

During the Elite Global Discovery process, the project team works with the firm to create a plan for eliminating third-party systems and manual processes currently used to support global operations. Drawing on Elite's extensive

experience, resources and Knowledge Base, the team analyzes complex statutory requirements by jurisdiction. Together they define an action plan to configure Elite Enterprise as the sole system of record for the firm's business data worldwide.

THE GLOBAL DISCOVERY WORKSHOP

During the three day on-site meeting, the firm presents its plan for success in the international marketplace, along with any challenges or concerns. To stimulate further discussion, two global discovery specialists give a Global Discovery presentation regarding globalization objectives and strategies.

Elite consultants lead a series of Global Discovery work sessions to flesh out the firm's requirements. During the engagement, specialists research topics, complete follow-up action items and prepare Global Discovery deliverables. All activities and work products are completed and delivered within three weeks.

QUICK FACTS

- Create a roadmap for implementing a global requirements framework
- Define Enterprise features that support international operations
- Eliminate the use of third-party software and manual processes to address local tax and statutory requirements in foreign countries
- Prepare the firm's system for international expansion
- Work can be completed in three weeks
- Fixed-fee engagement

OVER 40 YEARS OF PROVEN CONSULTING LEADERSHIP AND CLIENT SUCCESS

Our team of talented advisors is comprised of MBAs, CPAs, former firm CFOs and executive directors, and offers decades of experience working with some of the largest professional services firms in the world. We utilize a variety of methods consistent with the Balanced Scorecard system, Six Sigma, and those outlined in the American Institute of Certified Public Accountants' Practice Aid Series.
