

# TRANSFORM YOUR BUSINESS WITH ELITE 3E V2.6

ELITE 3E isn't just a new software application. It's a business process platform that offers powerful core financial and practice management features and built-in application development capabilities—all seamlessly integrated into one high-performance system. Now, with the release of 3E version 2.6 later this year, 3E will include a number of enhancements designed to provide greater stability, advanced capabilities and more power to your solution.

As our part of our commitment to provide the highest, most secure performance, version 2.6 will have the capability to support SQL Server 2008 and Windows Server 2008. We will also launch new products including Calendar Management, Outlook Integration, Purchasing and Fixed Assets.

You can look forward to improvements in the new business intake/conflicts search process including full NBI information on search results, redacted display of confidential information and improved workflow capabilities and history.

Additional enhancements include standard bill templates, improved month-end reporting, outlook integration for email and attachments, and email notifications for file requests.
