

3E OPTIMIZATION SERVICES THRIVE ON 3E

Your business is constantly evolving. Your software should evolve along with it. At Thomson Reuters Elite, we encourage you to regularly assess your use of 3E® in order to ensure you're maximizing your investment. The Elite Global Services team can help. We offer a variety of 3E Optimization Services to get even more value out of your 3E system, while taking it to the next level. As your business partner, it's part of our commitment to meet your growing needs and contribute to your success.

We view optimization as a joint journey throughout the whole life cycle of your product. By periodically assessing various aspects of your business and technology use, you will find ways to improve your processes. Since your go-live on 3E, Elite will continue to deliver new functionality and advancements in technology that may improve performance and support your goals while reducing complexity. In addition, Elite and our partner network frequently enhance or release complementary applications for the 3E environment that could make a difference for you. The 3E Optimization Services will help you pinpoint these opportunities and situations through the following.

- **Business consulting service** – Based on insights from 170+ 3E implementations, coupled with intimate knowledge on upgrades, integrated systems, and processes, we can help optimize your system in the areas of template enhancements, additional 3E modules and features, balancing review, business changes such as adding a unit, practice, office or currency, or through Elite Education Services where you can enhance your knowledge through training, the Elite Community, and the Elite Knowledge Base

- **Value added add-on software** – Discover more benefits when you use complementary applications from Elite or our partners, such as Workspace, MatterSphere®, Business Development Premier, eBillingHub®, xcelerate Budgeting and Forecasting, Cosine, DW Reporting, and Image Connect
- **Core 3E upgrade** – New capabilities launched in newer versions as well as new technology can improve workflows, automate routines, and speed processes
- **3E software standardization** – Reduce costs and redundancy with document and template automation, built-in reports, additional 3E modules, standard time entry, and easy information delivery

AN INNOVATIVE AND GLOBAL LEADER

Thomson Reuters Elite offers a complete enterprise business management solution to run all operational aspects of your firm, including business development, risk management, client and matter management, and financial management. Using our integrated suite of offerings enables you to increase visibility and streamline workflow, ultimately improving profitability and exceeding your clients' expectations.
